

Course #1: (3 hrs.) How to select a firearm for home defense or for CCW (Concealed Carry Weapon) permit - during this course I and my fellow instructors bring in our collection of firearms to demonstrate the differences between all of the different type of handguns, shotguns and rifles currently on the market. We review the pros/cons of each weapon system and also review accessories such as weapons mounted lights, weapon mounted lasers and the different type of sights you can buy for your weapons. The goals of this course is to provide you with enough information regarding firearms to make an informed decision on what type of firearm is best for you.
